About

AISS, an abbreviation for Amiga Image Storage System, is a pool of toolbar images and other useful artwork for AmigaOS based applications.

The AISSClassic version uses 32 colours PNG images in the AmigaOS 3.2 Glowicons palette and design.

Licence

Attribution - You must attribute the work in the manner specified by the author or licensor but not in any way that suggests that they endorse you or your use of the work.

Non-commercial - You may not use this work for commercial purposes. No Derivative Works. You may not alter, transform, or build upon this work.

For any reuse or distribution, you must make clear to others the license terms of this work. The best way to do this is reading the details of the licence on to the creative commons' web page:

Introduction

Category ^①									
Images ^②		File name ^③	Description ^④				Remark	24x24	16x16 ^⑥
		file_name	tag_1, tag_2, tag_3, etc.				1)	● ● ● ●	● ● ● ● ^⑦

① “Category” describes the category of the images below. (Categories will be implemented later)

② The row “Images” displays the normal, unselected icons in their actual size in accordance with ⑥

③ The row “File name” provides the name of the image file.

For the smaller pictures use “list_” before the file name - the different icon states are separated by the suffix of the file: “_g” for the ghosted image, “_h” for the hovered and “_s” for the selected image - the unselected image has no suffix.

To access an image file, use the following syntax:

“tbimages: [prefix_]filename[_suffix]”

④ The row “Description” features the tags related to the images.

The easiest way to find a specific image is to use the search function of the pdf viewer.

⑤ The row “Remark” provides an indicator to additional information which is available in a separate line at the end of the category. Also, toolbar examples are displayed in this line. (this feature will be implemented later)

⑥ In this area the sizes of the images are displayed.

⑦ This area shows the availability of the icons in accordance with the state and the image size.

The first information is related to size and availability of the image, the second information is the availability of icon states

- → full size image related to ⑦
- ◐ → half width related to ⑦
- ◑ → half hight related to ⑦
- → no image available

- Normal image - no suffix
- Ghosted image “_g”
- Hovered image “_h”
- Selected image “_s”
