

C_ExpectCovarInfluence

```
graph LR; R[R_ExpectCovarInfluence] --> C[C_ExpectCovarInfluence]; R --> ncol[ncol]; R --> nrow[nrow];
```

The diagram illustrates a central node, R_ExpectCovarInfluence, which is shaded gray and has three outgoing arrows. One arrow points to C_ExpectCovarInfluence, which is a white box. The other two arrows point to ncol and nrow, which are also white boxes. The arrows are dark blue and point from the right side of the R_ExpectCovarInfluence box to the left side of the other three boxes.
