

Release note: datacheck 1.1.0

Reinhard Simon

Thursday, September 25, 2014

Summary

This is primarily a maintainance release to be compatible with the latest base software (R 3.3.1). Some other ‘house holding’ changes are listed below.

Requirements

- R version 2.15.1 (recommended: latest R version)

New features

None.

Changes

- Vignette was removed from the build path and put under docs. This made the package smaller, removed some dependencies and incompatibilities.
- Changed the license from GPL 3 to the current institutional “CIP license” - which basically asks for ‘attribution only’.
- adopted a new release note format per release to facilitate public announcements

Deprecated features

- none

Removed features

- the automated tests were removed from the build
