# 1 Tested Version and Books used for the Validation

## 1.1 Packages Used

- 'sasLM' version: 0.10.0
- 'SAS' version: 9.4 Licensed and University Edition
- 'car' version: 3.1.2
- R version: R version 4.3.2 (2023-10-31 ucrt)

The 'car' package is not necessary for 'sasLM.' It is used for the comparison of the results.

If you see any difference between 'car' and 'sasLM', 'SAS' results coincide with 'sasLM', not with 'car.'

Before 'sasLM' is available on CRAN, you can download using the following command in R.

```
install.packages("sasLM", repos="http://r.acr.kr")
```

## 14 Test Summary

Package	Version	Total Count	Identical to SAS	Different from SAS
sasLM	0.10.0	195	195 (100%)	0 (0%)
car	3.1.2	195	173 (89%)	22 (11%)

All of the results by sasLM 0.10.0 were practically identical to those of SAS.

Last digit difference by 1 is resulted from the round-to-even number way of R rounding function.

If you are uncertain about the equivalence of the 'sasLM' to 'SAS,' you can check these examples using 'SAS onDemand' for free.
