You are at the IS-FOO BOF.
We didn’t pick the name, eh?

Agenda:

- Overview presentation.
- Discussion of WG structure and charter objectives.
- Remaining technical presentations from last night’s IP-ATM/ROLC/RSVP/INTSERV BOF.

Scope

Technology-specific answers about IP Integrated Services components.

- Service mappings
  - Controlled-load over ATM
- Setup protocol mappings
  - RSVP over bridged ethernets
- Adaptation protocols
  - Frame Relay delay computation. Subnet b/w managers.
- Statements of non-applicability
  - Guaranteed-delay not supported over avian carriers

Work Items

- Standards-track RFC’s (rare?)
- Informational guidelines (common?)

Structure

- Focused per-technology parallel activities: technology coordinators
  - Technical development
  - Document editing
  - Evangelizing
- Commonality identification and coordination: WG chairs and developers

Technologies (alphabetical...)

- ATM
- Cable Modems
- Ethernet
  - switched, traditional, mothered
- FDDI
- Frame Relay
- Token Ring
- XXX

Next Steps

- Discuss the above
- Charter
- Mailing list
- Technology coordinators
